Project Overview

FitBuddy is an AI-assisted fitness planning application that uses Gemini models to generate personalized workout suggestions based on a user's goals, fitness level, available equipment, and weekly schedule. The application can also provide general fitness guidance and progress tracking. Recommendations should be treated as general information, not medical advice.

Sprint Milestones

- Sprint 1: Set up the project, account/profile flow, and user preference form.
- Sprint 2: Connect Gemini model integration and generate structured workout plans.
- Sprint 3: Add general wellness guidance and clear safety messaging.
- Sprint 4: Add progress tracking, test main user flows, fix issues, and prepare the demo.

Assumptions and Notes

- The sprint schedule is a sample plan and should be confirmed by the team.
- Gemini-generated plans should be reviewed for clarity and safe, age-appropriate general guidance.
- Collect only the user information needed to personalize the plan and handle it responsibly.
- Team ID was not provided, so it is marked as "To be assigned."
