BRAINSTORMING & IDEA PRIORITIZATION TEMPLATE

Project: FitBuddy AI Fitness Plan Generator – Gemini Models

Team Leader	Abisreeya S
Team Member	Sahana K
Team Member	Sripriya C
Team Member	Rajakaleeshwari N

1. Brainstorming Objective

To generate practical and innovative ideas for developing FitBuddy, an AI-powered fitness plan generator using Gemini models. The goal is to create personalized, safe, easy-to-follow fitness recommendations based on user preferences, goals, fitness level, and available time/equipment.

2. Brainstorming Ideas

No.	Idea	Description	Expected Benefit
1	Personalized Workout Generator	Generate workout plans based on fitness goals, fitness level, time, and equipment.	Customized exercise routine
2	AI Diet & Nutrition Suggestions	Provide general meal and nutrition suggestions aligned with fitness goals.	Better nutrition planning
3	Daily Fitness Plan	Create a simple daily schedule combining exercise, warm-up, cool-down, and rest.	Easy daily guidance
4	Progress Tracking	Allow users to record workouts and monitor progress over time.	Motivation and measurable progress
5	AI Fitness Chatbot	Use Gemini to answer fitness-related questions and explain exercises.	Interactive user support
6	Adaptive Workout Plans	Adjust future plans based on user feedback and completed workouts.	More flexible personalization
7	Exercise Demonstration Guidance	Provide step-by-step instructions, safety tips, and common mistakes for exercises.	Improved exercise understanding

3. Idea Prioritization Criteria

Criterion	Weight	Meaning
User Value	30%	How useful the idea is to the target user.
Technical Feasibility	25%	How practical it is to implement with available technology.
AI/Gemini Relevance	20%	How effectively Gemini models can support the feature.
Impact	15%	Potential improvement to the overall fitness experience.
Implementation Effort	10%	Estimated time and effort required; lower effort receives a better score.

4. Idea Prioritization Matrix

Idea	User Value /10	Feasibility /10	Gemini Relevance /10	Impact /10	Effort /10	Priority Score /10	Priority
Personalized Workout Generator	10	9	10	10	8	9.5	High
AI Diet & Nutrition Suggestions	9	8	9	9	7	8.6	High
Daily Fitness Plan	9	9	9	9	9	9.0	High
Progress Tracking	8	8	7	9	7	7.9	Medium
AI Fitness Chatbot	9	9	10	9	8	9.2	High
Adaptive Workout Plans	9	7	10	10	6	8.8	High
Exercise Demonstration Guidance	8	8	8	9	7	8.0	Medium

5. Selected Priority Ideas

1. Personalized Workout Generator
2. AI Fitness Chatbot
3. Daily Fitness Plan
4. Adaptive Workout Plans
5. AI Diet & Nutrition Suggestions

6. Final Selected Concept

The team selected a personalized AI fitness planning system as the core concept. FitBuddy will use Gemini models to understand user inputs and generate structured fitness plans. The system can combine personalized workouts, daily schedules, progress-based adjustments, and conversational AI assistance in a single platform.

7. Team Discussion & Decision

The contributions below are suggested sample entries for the template. Please revise them if the team's actual discussion or individual responsibilities differed.

Team Member	Contribution / Suggestion	Decision / Remarks
Abisreeya S	Suggested the core idea of an AI-based personalized fitness planner.	The team approved the FitBuddy concept.
Sahana K	Suggested using Gemini AI to generate personalized workout plans.	Gemini AI was selected for fitness-plan generation.
Sripriya C	Suggested a user-friendly interface and daily workout schedules.	The team agreed to provide a simple, user-friendly interface.
Rajakaleeshwari N	Suggested storing user details and tracking fitness progress.	The team agreed to support user data management and progress tracking.

8. Conclusion

The brainstorming process helped the team identify the most relevant features for FitBuddy. The prioritization matrix provides a structured way to focus development on features that offer strong

user value, practical implementation, and effective use of Gemini models.
